

Case Study: RORY

My name is Rory I'm in S5 and recently I had the opportunity to do work experience at Wallace McDowall as a quality inspector and technical programmer.

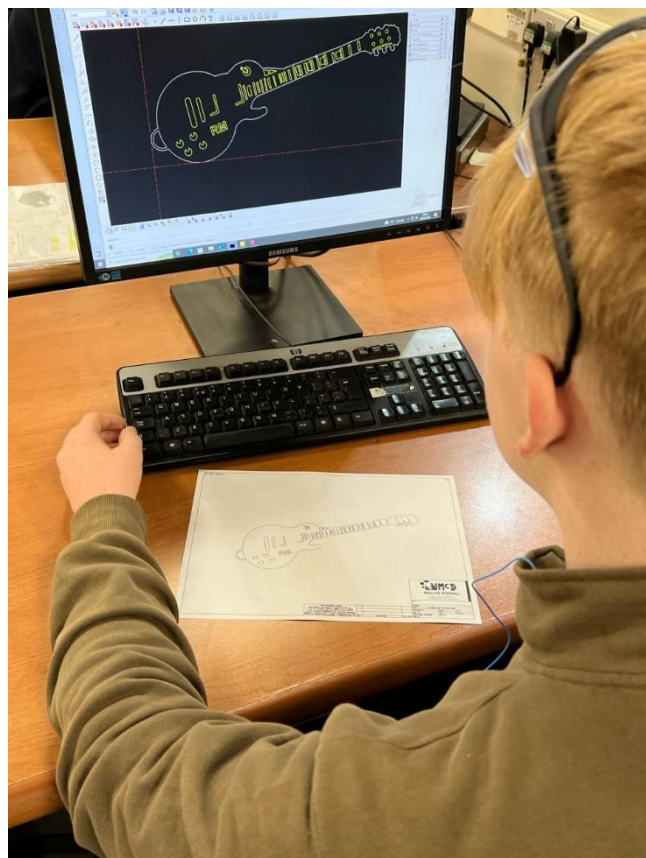

The time I have spent here has been brilliant. The guys I spoke to have all been friendly and just great at teaching me all the tasks throughout their day and always helped when I didn't understand something which in turn helped me to improve.

I have learned a lot about how quality inspection and how the department works and how all the guys interact on a professional level and how it is one of the most important parts of the process. In turn the technical programming aspect of the experience was also very interesting, and I learned a lot more about cad and engineering drawings.

The opportunity I was given was amazing and the skills I've learned will stick with me for a lifetime and hopefully I will be able to work with Wallace McDowall and the people that work here again in the future.

**Staff have
commented that:**

Rory acted professionally during his time at Wallace McDowall and was very quick to pick up the CAD/Inspection basics and even designed his own part.
