

## CASE STUDY: MARTIN MCNALLY

My name is Martin, I am 15 years old, and I am in S4. I had the opportunity to do my work experience at Wallace McDowall. I have been round the full production process which includes laser/punch, forming, machine shop, welding fabrication and the paintline. The people I have been working with have been very friendly and always showed me what to do. When I needed help or when I was struggling, they would explain and bring in a new perspective to make it easier for me. I have really enjoyed the week I've had here, and I would love to come back. Thanks to all the workers that helped me, I have had an amazing time.

### STAFF COMMENTS

Martin acted professionally during his time at Wallace McDowall and was very quick to pick up the basics of our manufacturing process.
